RECOMMENDED RUPEE PRICE LIST INDIA - 2013

Engineering manufacture in Hanusovice started in year 1957 and gradually oriented to production of machinery parts for brakes and wide assortment of pipes for air and hydraulic systems. In year 1999 the company was transformed to joint stock company and in frame of pragmatic restructuring the company ZKL Hanusovice, a.s., was founded. It is specialized in production of rolling bearings components and namely spherical rollers and pressed steel sheet cages as well as brass machined cages. Hanusovice company has also a very successful production program of fuel and hydraulic pipes for automotive industry.

Integral part of traditions in research, development and production of rolling bearings is also the history of ZKL bearings sales network formation. In this field we continue in earlier activity of former foreign trade corporation Investa, which had been in charge of sales of ZKL bearings worldwide till the year 1978. The continuity of that activity nowadays secures ZKL Bearings CZ, a.s., the member of ZKL Group, and continuator of earlier trade division specialized in bearings sales of the said corporation.

The present structure of ZKL Group enables to efficiently develop and strengthen its competitiveness in comparison with world-leading bearing producers, which means that it keeps at disposal effective design and development basis, sufficient production capacities, well-educated and qualified staff and dynamically advancing sales system formed by network of distributors appointed for each individual territory, reflecting specific conditions of each national market.
